

### What can we do for you?

Sonceboz Group is focused on **“Who”, rather than “What”**.

We truly believe in human impact: a career at Sonceboz is more than just a job. Because **you are unique**, we help you to plan your career management, favor your evolution, and help you to achieve your goals. We offer attractive working conditions and opportunities in an environment that provides a high quality of life.

**Welcome to the world of innovative motion; welcome to Sonceboz!**

Are you ready for your next professional challenge?

We are growing and we have created an **Electro-Hydraulic Project Manager** position.

Reporting to the Head of the Business Unit R&D, you will:

- Lead an **innovation project** within the electro-hydraulics field from its very early beginning until the introduction in production
- Drive the development, validation and industrialization phases of the project relying on your deep technical knowledge in mechanics and hydraulics.
- Work closely with all the teams involved in your project (Sales, Research & Development, Design, Industrialization, Purchasing, Quality, Production, Marketing...) in order to deliver our Customers a very high-value product, meeting specific expectations, with no equivalent on the market, on time, and within the budget
- Be responsible of all the aspects of the project (including technical topics) directly **in touch with the Customer** (TIER 1 or OEM)
- Rely on the latest Sonceboz permanent magnet DC motor technologies in order to **anticipate the future needs of the Customer and propose mechatronic solutions tailored to his specific expectations**

The challenge in this job will be performing the **interface with demanding international Customers** on technical matters while you will be coordinating the internal teams' work. You will be the connection between Sonceboz and the Client during the different phases of the project, considering the Client's needs. You rely on your **experience in managing complex projects, backed by an advanced degree in Engineering (MSc in mechanical engineering or equivalent)**, and your **knowledge in mobile hydraulics**.

**Your fluency in English, German and French or the willingness to learn French is required in this role.**

The reward will be the ability to **run your project from start to finish**, working on tomorrow applications with dedicated talented professionals committed to your side to achieve the objectives.

If you are interested in this opportunity, please, send us your application at [bewerbung@sonceboz.com](mailto:bewerbung@sonceboz.com). We look forward to hearing from you! **In your letter, let us know why this job is a great fit for you, not only regarding your qualifications but also by telling us how this opportunity will advance your career.**

### About Sonceboz Group:

The core competencies of Sonceboz are design, development, industrialization, and the production of mechatronic drive systems and electronic motors that are dedicated to harsh environments for our Automotive/Trucks/Industries Customers.

Our innovative and tailored solutions reflect our commitment to ecology, safety and comfort.

**“From Mind to Motion”**: our goal is to offer our Clients a compact, robust, and reliable motion system.

*Innovation, anticipation, and zero-defects* are our key words.
